

Albert Einstein

(1879-1955)

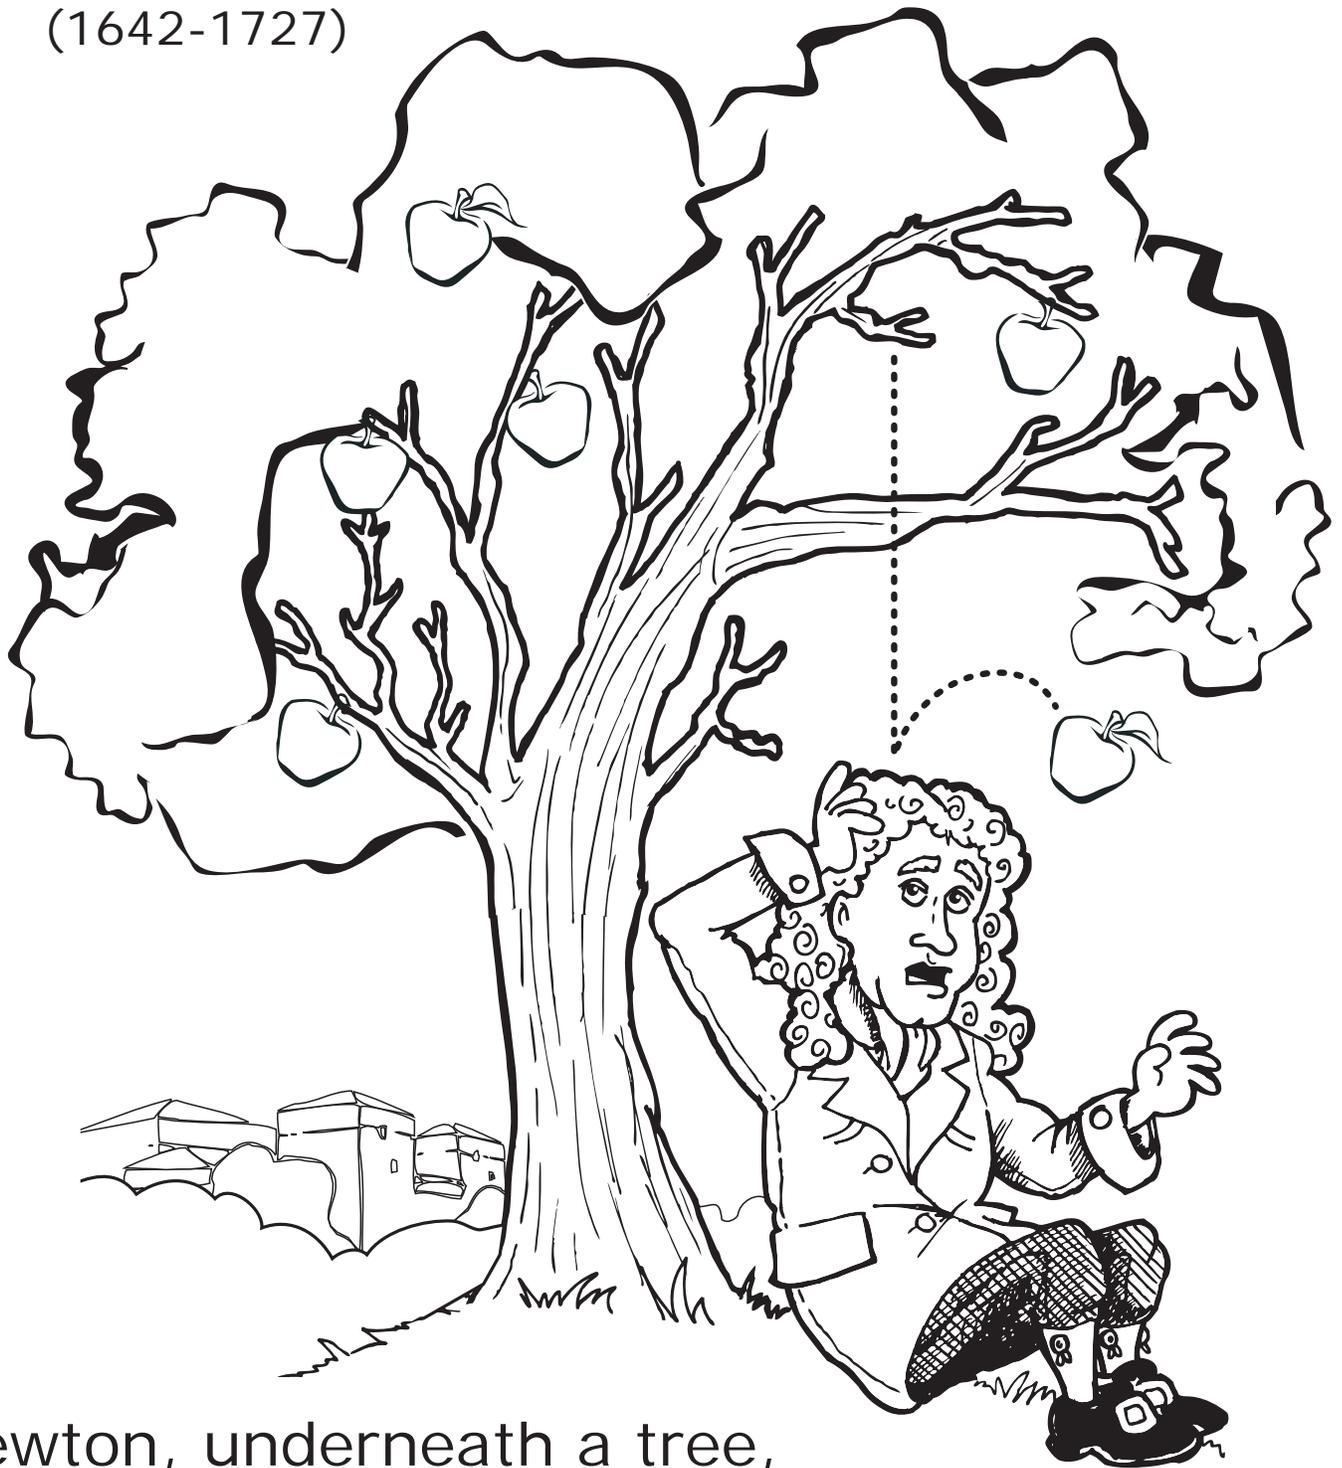

Einstein said
"It's plain to me,
Mass can change
to energy."

Using energy to shine,
Stars get lighter all the time.

Isaac Newton

(1642-1727)

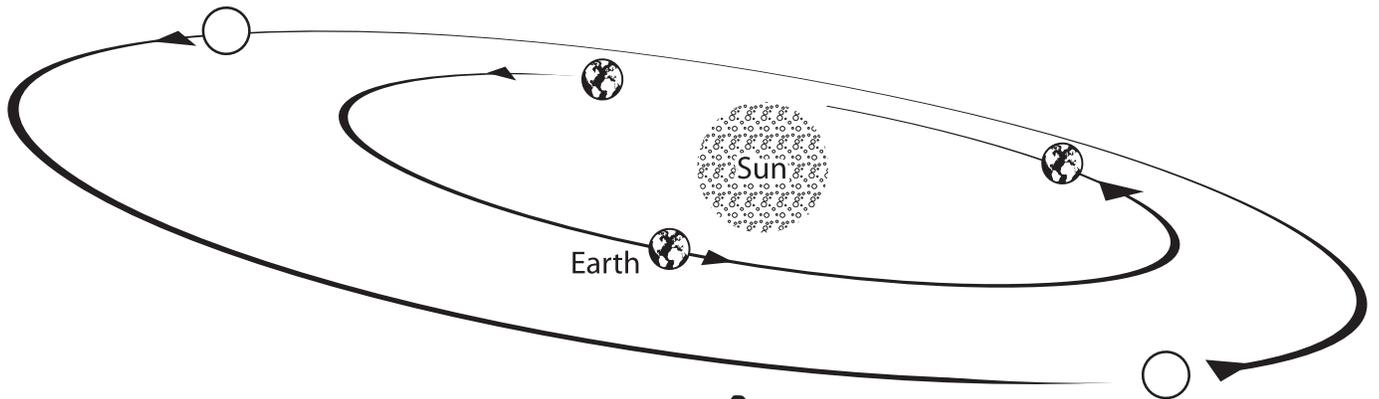

Newton, underneath a tree,
Said "I think that gravity

Makes the moon go round and round,
Pulls sweet apples to the ground."

Nicolas Copernicus

(1473-1543)

[Pronounced co-PER-ni-cus]

Copernicus, he was the one

Proved the Earth
goes round the sun.

"Don't you see,"
he said, "it's clear.
Earth goes round
in just one year."

Now draw yourself as a physicist.

My name's _____, and that's me making a discovery.

Physicists have lots of fun.

When I grow up, I might be one.
